Hansen's TEC-BASE 2

Upgrading from Hansen's TEC-BASE 2 Preview 1.0

- Run the backup script from within Hansen's TEC-BASE 2 Preview 1.0.

- Quit FileMaker.

- Copy your "TEC-BASE Backup" folder to a safe location.

- Copy your "Custom" folder with your custom HTML pages to a safe location.

- Remove the old "TEC-BASE Files" folder from the server. Keep a copy of it just in case.

- Remove the old "tecbase" folder from FileMaker's Web folder. Keep a copy of it just in case.

- Download and expand Hansen's TEC-BASE 2.0 from the Hansen Solutions Website.

- Copy the new "TEC-BASE Files" to the server.

- Copy the new "tecbase" folder to FileMaker's Web folder.

- Replace the new "TEC-BASE Backup" folder with the old "TEC-BASE Backup" folder from the Preview version.

- Copy your custom HTML files into the new "tecbase/Custom" folder. Replace files with same names.

- Open "Hansens_TEC-BASE.fp5". Use **tb2admin** for password.

- Read and respond to the license agreement.

- Go to "Setup > Tools" and select "Restore from Backup."
